RE: Second Call for Interest (CFI) for the procurement of the 1st light instruments for the Eastern Anatolian Observatory (Dogu Anadolu Gozlemevi, DAG)

Dear Madam/Sir,

We are pleased to inform you that the Eastern Anatolian Observatory (DAG) is looking for offers from industry and academic institutions - in Turkey and abroad - for the turn-key delivery of a number of astronomical instruments, from spectrographs to imagers, to be installed on the new 4 m Turkish telescope, for 1st light in August 2020.

The instruments budget has been allocated by the Ministry of Development of Turkey to ATASAM (Ataturk University Astrophysics Research and Application Center — Erzurum, Turkey), the institute in charge of the DAG observatory.

The CFI report ODA-CFI-SPE-000-2.0.pdf (see <http://atasam.atauni.edu.tr>) gives the details allowing you to evaluate your interest, make a cost estimate and answer the call. We emphasize that we will welcome propositions from consortiums.

The deadline to submit an answer is September 15, 2017, 17:00 UTC, by post and electronic mail. The documents to be received must carry the stamp and legal signature of the instrument manufacturers representative.

Any questions shall be directed to the FPI-PM with copy to the director of ATASAM, Dr. Cahit Yesilyaprak. Contacts details are given in the CFI report.

Sincerely yours,

Laurent Jolissaint

FPI-PM

Cahit Yesilyaprak

Director of ATASAM

DAG-PI
